U.S. CHEMICAL AGENT *and Munitions Stockpiles Map*

Umatilla Chemical Depot
Chemical Materials Agency
Percentage of original stockpile: 12%

Umatilla Chemical Agent Disposal Facility
Technology: Incineration
· Blister agent in ton containers
· Nerve agent in projectiles, rockets, bombs, mines and spray tanks

Deseret Chemical Depot
Chemical Materials Agency
Percentage of original stockpile: 44%

Tooele Chemical Agent Disposal Facility
Technology: Incineration
· Blister agent in projectiles, cartridges and ton containers
· Nerve agent in mines, cartridges, projectiles, rockets, bombs, spray tanks and ton containers

Newport Chemical Depot
Chemical Materials Agency
Percentage of original stockpile: 4%

Newport Chemical Agent Disposal Facility
Technology: Neutralization
· Nerve agent in ton containers

Edgewood Chemical Activity
Chemical Materials Agency
Percentage of original stockpile: 5%

Aberdeen Chemical Agent Disposal Facility
Technology: Neutralization/Biotreatment
· 100% of the stockpile has been destroyed

Pueblo Chemical Depot
Assembled Chemical Weapons Alternatives
Percentage of original stockpile: 8%

Pueblo Chemical Agent-Destruction Pilot Plant
Technology: Neutralization/Biotreatment
· Blister agent in cartridges and projectiles

Blue Grass Chemical Activity
Assembled Chemical Weapons Alternatives
Percentage of original stockpile: 2%

Blue Grass Chemical Agent-Destruction Pilot Plant
Technology: Neutralization/Supercritical Water Oxidation
· Blister agent in projectiles
· Nerve agent in projectiles and rockets

Johnston Atoll
Chemical Materials Agency
Percentage of original stockpile: 6%

Johnston Atoll Chemical Agent Disposal System
Technology: Incineration
· 100% of the stockpile has been destroyed

Pine Bluff Chemical Activity
Chemical Materials Agency
Percentage of original stockpile: 12%

Pine Bluff Chemical Agent Disposal Facility
Technology: Incineration
· Blister agent in ton containers
· Nerve agent in rockets and mines

Anniston Chemical Activity
Chemical Materials Agency
Percentage of original stockpile: 7%

Anniston Chemical Agent Disposal Facility
Technology: Incineration
· Blister agent in cartridges, projectiles and ton containers
· Nerve agent in cartridges, projectiles, rockets and mines

NOTE
Chemical agent information is based on contents of original stockpile, prior to destruction operations.
